### **RIFLE BASIX BROWNING A-BOLT SPRING KIT INSTRUCTION SHEET**

- 1.) Confirm rifle is unloaded. Remove bolt from receiver. Remove barreled action from stock. Note placement of magazine box and flat spring spacer on bottom rear of receiver.
- 2.) Reduce weight of pull spring pressure by turning weight of pull adjustment screw **clockwise** until it stops (Pic 1).
- 3.) Remove trigger pivot pin (Pic 2). Position trigger so weight of pull spring may be removed (Pic 3).
- 4.) Install new weight of pull spring and re-install trigger pivot pin. Turn adjustment screw counter-clockwise to compress spring half way.
- 5.) Re-install bolt into new action and adjust weight of pull screw.

***Always handle your rifle with care. Close bolt slowly and carefully while keeping your rifle pointed in a safe direction.***
